DISCRETIONARY CRITERIA

If after application of the Objective Criteria above, additional quota positions remain, USA Cycling **may**, but is not required to, nominate athletes to the Team through discretionary criteria. The following criteria are considered in priority order, with all quota positions being filled through Criterion 1 first, then 2 if positions remain, and so on. *For Team Events, athletes will only be nominated using criterion #2 – Maximize Team Performance.*

1. **Medal Capable** – USA Cycling **may** nominate Medal Capable athletes to the Team. A Medal Capable athlete has clearly demonstrated the ability to produce a medal winning result in the competition for which the athlete is being selected by achieving one of the following criteria:
 - Winning a medal (top-three finish) in the past 24 months at the Junior World Championships and demonstrating the continuing ability to perform at the level or higher based on results and performances in competitions in the past 12 months.
2. **Maximize Team Performance** – USA Cycling **may** nominate athletes who Maximize Team Performance to the Team. For Team Pursuit, Team Sprint and Madison, it is necessary to select the best team and not necessarily the best individual athlete(s). Team chemistry and the ability of an athlete to fulfill a specific role on the team are vital for success. Building a cohesive team is key to achieving the best possible result.

Subjective judgement is required to select the athletes who will work together as an effective team and contribute to the execution of USA Cycling's strategy for team success. Where reasonable, USA Cycling will use objective measures to support subjective judgements under this criterion.
3. **Future Medal Capable** - USA Cycling **may** nominate Future Medal Capable athletes to the Team. A Future Medal Capable athlete has the potential to produce a medal-winning result within three years at the event they are being selected for by demonstrating a recent trend of improvement in key performance indicators outlined in the Data to Support Discretionary Selections in training or competitions.
4. **Best Predicted Finish** – USA Cycling **may** nominate athletes to the Team based on Best Predicted Finish. USA Cycling will determine which athlete or athletes it predicts will finish highest in the event for which they are being selected using Data to Support Discretionary Selections. This forecast aims to provide an evidence-based estimate of the athlete's final standing.
